MERN Stack • Spring Boot • Python • Machine Learning • Generative AI

October 16, 2026

PROFESSIONAL PROFILE

Software engineering undergraduate and Certified AI & ML Engineer (overall A+, 94/100) with hands-on experience building full stack web applications using the MERN stack with TypeScript and Spring Boot, and applying Python-based machine learning and generative AI. Founder of AMG Lanka Group and SL Travel Buddy, a passenger-services app for Sri Lanka, and manager of the family-owned Gunasekara Travels bus business, which adds practical experience in operations, finance and customer service. Seeking a Junior Full Stack Developer or AI/ML Engineer role where I can combine software engineering skills with real business understanding.

CORE COMPETENCIES

Full Stack Development
React.js, TypeScript, MERN stack, Spring Boot / Spring Framework, JavaFX and REST-based web applications, Java, Python

AI & Machine Learning
Python, NumPy, Pandas, regression, XGBoost / LightGBM / CatBoost, CNNs and transfer learning (ResNet)

NLP, LLMs & MLOps
Transformers, prompt engineering, LLM fine-tuning, RAG, vector databases, Docker, MLflow, CI/CD, AI agents

Databases
MySQL, PostgreSQL, SQL, MongoDB and database management systems

Business Management
Operations, finance, accounting, account management, marketing and customer service

Teamwork & Problem Solving
OOP, algorithms and problem solving (HackerRank certified), team building and communication

PROFESSIONAL EXPERIENCE

AMG Lanka Group (Pvt) Ltd | Founder
August 2026 – Present · Sri Lanka

- Founded AMG Lanka Group to launch new business ventures and grow the passenger transport business, including plans to expand the bus fleet through tenders.
- Lead business planning and decision-making alongside ongoing software and product development.

SL Travel Buddy | Founder & Full Stack Developer
2025 – Present · Sri Lanka

- Founded and develop SL Travel Buddy, an app for passenger services in Sri Lanka, covering bus booking and travel information.
- Built a Bus Booking web application.& Bus Business Fleet Management System (SaaS) application
- Manage the project end to end: requirements, design, development and version control with Git/GitHub.

Gunasekara Travels | Owner / Manager
2015 – Present · Sri Lanka

Family-owned bus travel business, established 1991

- Manage day-to-day operations of the family bus travel company, including finance, accounting and account management.
- Handle customer service, communication and marketing for passenger travel services.
- Combine business experience with technical skills to identify where software can improve passenger services.

EDUCATION

Graduate Higher Diploma in Software Engineering (HDSE) — Jan 2025 – May 2027 (expected)
IJSE, Institute of Software Engineering

Certified AI & ML Engineer (CAME) — Nov 2025 – Jun 2026
IJSE, Institute of Software Engineering · Overall A+ (94/100) · Certificate issued 3 September 2026

Web Development & 2D Game Development — Dec 2022 – Dec 2023
Java Institute for Advanced Technology

G.C.E. Advanced Level (Combined Maths, Physics, Chemistry) — 2020 – 2024
Devananda College, Ambalangoda

G.C.E. Ordinary Level — 2014 – 2019
Devananda College, Ambalangoda

SELECTED PROJECTS

- **Bus Fleet Management System**
  MVC / layered architecture based Java and JavaFX Desctop application · Java + JavaFX + MySQL
- **Mental Health Center Management System**
  Desktop application · Java + Layered Architecture + ORM + JavaFX + MySQL
- **Student Management System**
  Desktop application · Java + Layered Architecture + ORM + JavaFX + MySQL
- **Company Website**
  Website for the AMG Lanka Group · HTML + CSS + JS
- **Hotel Website**
  Website for the hotel Lagoon Villa · HTML + CSS + JS
- **Supermarket POS**
  Web application for the AMG Super-mart · HTML + CSS + JS + MySQL
- **AMG Note**
  Web application for the Store my google docs Study Notes · HTML + CSS + JS + MySQL + Github Server Store
- **Spring Boot Application**
  Back-end application developed with Spring Boot during the IJSE Graduate Diploma in Software Engineering
- **Bus Booking System**
  Bus booking platform built for the SL Travel Buddy · MERN / Spring Boot + Java + React+ TypeScript + PostgreSQL
- **Bus Business Fleet Management System(SaaS)**
  Fleet management system built for the SL travel Buddy · Spring Boot + Java + React + TypeScript +PostgreSQL
- **AI & ML Engineer Capstone**
  Capstone project completed in the Certified AI & ML Engineer programme, covering machine learning, deep learning, NLP/LLMs, RAG and MLOps deployment
- **Fair Vision**
  Detecting and Mitigating Bias in a CNN-Based Age Group Classification System Using FairFace

TECHNICAL SKILLS

Programming	Java, Python, JavaScript, TypeScript, PHP
Web Development	HTML, CSS, React.js, MERN stack, Spring Boot / Spring Framework, JavaFX
AI & ML	NumPy, Pandas, regression, gradient boosting, CNNs, Transformers, LLM fine-tuning, RAG, AI agents
Databases	MySQL, PostgreSQL, SQL, MongoDB
Tools & Platforms	Git/GitHub, Docker, Postman, IntelliJ IDEA, PyCharm, VS Code, Linux, Windows, MLflow, Figma, Microsoft Excel, Google Workspace, Adobe Photoshop
Business & Soft Skills	Business management, customer service, communication, teamwork, team building, problem solving, research

CERTIFICATIONS & ADDITIONAL INFORMATION

- Certified AI & ML Engineer – IJSE (Credential ID: CAME-2026-10015, issued September 2026).
- HackerRank certificates (June 2026): Problem Solving (Basic), Python (Basic), Java (Basic), JavaScript (Basic), CSS (Basic), SQL (Basic), React (Basic).
- Key strengths: problem solving, teamwork, communication, business management and learning new technologies quickly.
- Languages: Sinhala and English.
